

Minorplanet Livesey Group Case Study

Livesey Group

The Livesey Group is the North West's leading maintenance and refurbishment contractor, employing a large workforce covering all trade activities. Livesey operates a fleet of vehicles serving the whole of the North West, as well as operating on a national basis.

Livesey wanted to be able to monitor their fleet to ensure an efficient workforce, and also wanted to lower fuel and wage bills whilst improving customer service. Andrew Rhodes, Company Accountant for Livesey comments "We are saving up to £1,000 per week on our wage bill. Our workforce runs much more efficiently now they know their productivity is monitored."

Fuel represents a major cost for Livesey, through using the VMI™ system they have been able to not only improve operational efficiency but also reduce fuel usage and associated costs.

"We are saving up to £1,000 per week on our wage bill. Our workforce runs much more efficiently"

Andrew Rhodes

Andrew continues "The cost of fuel has gone up by 20% in the past 12 months but we've still managed to reduce our fuel bill by £20,000 per year."

The VMI™ system is proving invaluable to the Livesey's sales and marketing function, and is enabling the company to win new business "I am convinced that having the Minorplanet system is helping us to win more business as we're offering an excellent service."

"We can prove to our customers that our employees arrive on time and leave when they should. This ensures payment and pleases the employees." Andrew concludes.
